

TSYS CounterPASSSM The Next Generation in PC Point-of-Sale Solutions

TSYS® is committed to delivering innovative payment applications to advance its mission to move any payment form, anywhere, over any network, through any payment device.

Powerful Point-of-Sale Solution

TSYS CounterPASS is a robust, PC-based, point-of-sale application that is ideal for retailers interested in a payment processing solution with more payment types, security and functionality than typically available with traditional, countertop terminals. This intuitive,

CounterPASS is one in a series of payment applications offered by TSYS as part of its **n>genuity in action: n>genSM** initiative for innovation. It is made possible by leveraging the power of Infonox® technologies.

multi-function, hosted payment solution rides the TransIT™ rails and seamlessly integrates with TSYS processing to provide your merchants with the next generation

in payment solutions along with best-in-class support services.

CounterPASS is a thin-client software application with advantages that include:

- Seamless compliance and software updates
- Sensitive data storage in a PCI-compliant data center

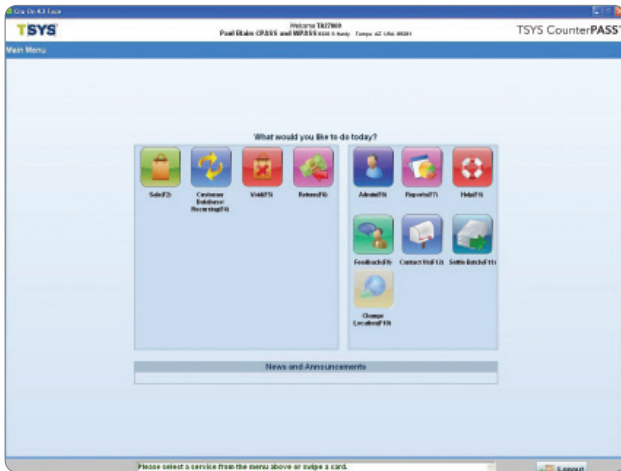

- 24/7 TSYS support professionals with remote system monitoring

Payment Acceptance

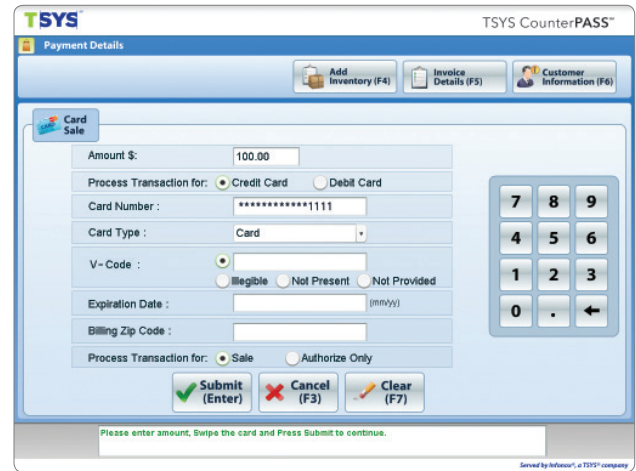

CounterPASS efficiently processes traditional payment forms like credit, debit and recurring payments. Additional payment applications like gift cards, check cashing, money orders and transfers, remote deposit capture, and bill pay can be easily and seamlessly integrated as they become available to meet merchant needs and capture incremental revenue.

By offering CounterPASS, the next generation in payment processing solutions, you can position your business for unprecedented opportunities and enhanced merchant relationships.
