

WebPASS™

The Next Generation in Virtual Point-of-Sale Solutions

TSYS is committed to delivering innovative payment applications to advance its mission to move any payment form, anywhere, over any network, through any payment device.

Virtual Point-of-Sale

WebPASS is a fully hosted, virtual payment solution that rides the TransIT™ rails, seamlessly integrating to TSYS processing to provide your merchants with the next generation in payment solutions with best-in-class support services. WebPASS tackles the unique requirements of mail order/telephone order (MOTO), recurring

WebPASS is one in a series of payment applications offered by TSYS as part of its **n>genuity in action: n>gen** initiative for innovation. It is made possible by leveraging the power of Infonox technologies.

and Card Not Present (CNP) batch payment environments.

Because WebPASS is a virtual application, both software and transaction data are managed and stored by a secure host. It's simple for merchants to implement and use because WebPASS is accessed via the Internet from a secure URL. The result is dependable and efficient transaction processing with effortless software and compliance updates

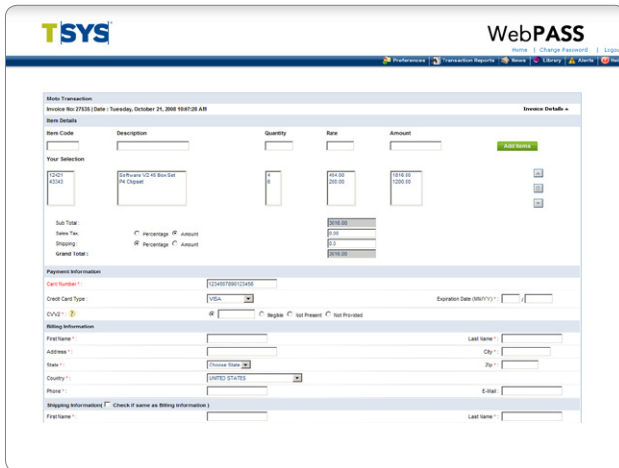

Payment Acceptance

WebPASS offers the following payment acceptance types, all with the familiarity of a typical web browser user experience:

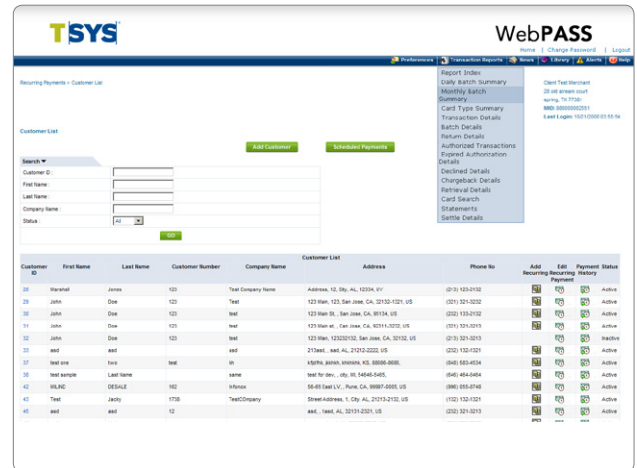

- Credit
- Debit
- Check
- CNP
- Recurring payments
- And more

By offering WebPASS, the next generation in payment processing solutions, you can position your business for unprecedented opportunities and enhance merchant relationships.
